

GISO20482-145 Erichsen Deep Draw Test Fixture

Tests in accordance with ISO 20482

GISO20482-145 Erichsen Deep Draw Test Fixture tests metallic sheets and strips having a thickness from 0,1 mm up to 2 mm and a width of 90 mm or greater to undergo plastic deformation in stretch forming. This fixture tests in accordance with specifications stated in ISO 20482. The fixture is outfitted with a 60 mm female cup adapter with a hole for a cross pin. Adapters are available for your test machine. Contact our engineers today for help choosing the best test fixture for your application.
