

### GT839-733 Edge Crush Test Fixture

Tests in accordance with Tappi T 839

The TestResources GT839-733 Tappi T 839 Edge Crush Test Fixture tests in strict accordance with Tappi T 839 to determine the edgewise compressive strength, parallel to the flutes, of a short column of single-, double-, or triple-wall corrugated fiberboard.

This fixture should be paired with compression platens and a precise compression test machine with force capacity no less than 500 lbs. Call today for more information about this test fixture.
